

English: **Technical data sheet**

Self-adhesive foil S-4215 MF

Self-adhesive foil S-4215 MF

date: 29.09.2018

color: transparent

temperature range: -40° bis +90 °C

adhesive: modified polyacrylate

support: fleece , 12 g/ m²

interliner: release paper, yellow, 90 g/ m²

adhesive weight: 140 g/ m²

total thickness: 0,15 mm

adhesion: min 25 N / 25 mm
Contact time: 1 h

adhesive properties:

The MF adhesive is a modified polyacrylate and has good properties in terms of aging and climate resistance. It exhibits very high adhesive forces combined with a very good tack on a wide range of surfaces, especially to low-energy substrates such as PE, PP or EPDM, among others.

We reserve the right to make changes at any time. Before using the product, it is the responsibility of the purchaser to check for himself whether it is suitable for his intended use with regard to possible influences affecting the application. All data contained in this technical data sheet are approximate values.
